

# 'Arts and Crafts throughout the Ages'

## Case Study - Spring 2021-2022

Our History based topic was packed full of creativity.  
Here is a taster of what was covered.

### Literacy

Year 3 continued to delve into the classic story of Alice in Wonderland. This time taking inspiration from its imagery to write a calligram poem. A calligram uses a picture outline to bring the words to life. Our poems were amazingly creative - not only in the form they took but the words selected.

### Science

What an amazing time we had learning all about light and shadows. The class have really shown they have understood how to think like scientists and have learnt some tricky vocabulary too!

### Maths

In Maths, we explored measuring – length, volume and weight. We had great fun learning to use the resources accurately.

### Music

We became Vikings during music! We experimented with 'call and response' singing and beating drums in time to rowing our Viking ship.

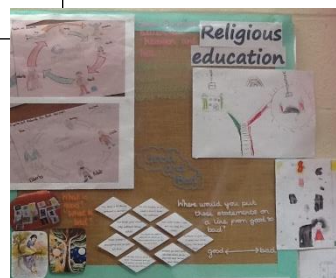

### RE

This term's RE unit was all about 'good and bad'. We had lots of interesting debates about whether something could be seen as bad if it was done with good intentions.

### Art

As well as all the great Bronze and Iron age crafts we experimented with, we carried out an art project on 'The Beaker People' pottery. We studied the intricate designs, sketch them, painted them and then make our own beaker pots. We decided it was a lot trickier than it looked!

### History

In History we found out all about the Stone Age, Bronze Age and Iron Age and when they occurred on the timeline. We explored how history has changed our way of life today, particularly looking at the arts and crafts.

### PE

Netball certainly brought out the competitive side of the class!

They worked hard on their throwing and catching skills (bounce and chest pass) and the all-important pivoting manoeuvre.

Some great work by everyone.
