

Greek Gods and Goddesses

Literacy - We explored the poem 'A Love Letter to the Stars' and wrote our own poems to a natural phenomenon of our choice. We read 'The Princess Blanket' and designed our own blanket to keep the princess warm. In our writing, we applied our descriptive techniques to describe a blanket and write a letter to persuade the King that our blanket was the perfect choice for the princess.

Music - As part of our music learning, we explored the history of baroque. We learnt about different composers and discovered Canon D.

History - In our history learning, we explored all of the legacies that the Ancient Greeks left and discovered which legacies still have an impact today. After learning about the successes of their civilisation, we debated Ancient Greek legacy we thought was the most significant.

Greek Pottery

The Greeks were famous for lots of things but especially the pottery. They had different pots for different things such as carrying goods or just for decoration.

PE - In PE, we have applied our teamwork skills in our ultimate frisbee learning. We have developed our balances and explored alternative ways of travelling in our gymnastics learning.

Science - We have been learning about the heart and lungs in science. To begin our learning, we identified the names and functions of parts of our circulatory and respiratory systems. We even made our own blood to help us to visualise the components of blood!

Art - We discovered lots of facts about Greek pottery and even explored some pottery from Greece to inspire our artwork. We developed our drawing and painting skills to create our Greek pottery paintings.
